## THE GAME OF RAINBOW magic

By Alice

One day I was playing with my friends Sophie, Andy, Allison, Eli, Taiga, Ethan, Kuga, Alex another Sophie and Lindsey. I love to play fairy magic, because I love chasing the goblins and someone picks a series and picks a fairy from the series. Sometimes we do a meow, meow to meeting, because we need a plan for the week. Before JJ helped us catch the goblins, but he didn't play this week. I think he is playing other friends. Hopefully he will play with us in the future.

# THE MONTHLY MONITOR:

By Julia and Eliana *Is it better to be a younger or an older sib-*

## Younger

I think that younger siblings are much better or luckier than older siblings. For example most parents are worried about the older sibling because they have never let their child do something before like a sleepover. However then when the younger kid comes along the parent has more experience, so they let the younger sibling do it and at a younger age.

Another reason younger siblings have it better and are luckier is because they get hand me downs. While its true most people don't like hand me downs, some can be really good. An example would be; say you get shoes from your older sibling. You don't have to break them in and kill your feet the first week you have them.

## Older

I believe that older siblings are better because they are so much cooler! For example; older siblings get new clothes, unlike younger siblings who get hand me downs. New clothes are always clean and not damaged. Say the younger sibling gets jeans, but they are all ripped and have grass stains on them.

Another reason older siblings are much, much cooler than younger siblings is because you get to try new things before your younger sibling does, like a sleepover. You get to stay up late and tell ghost stories, while your younger sibling doesn't.

# Mine Craft 2: The Hatch

By: Oliver

Ever since I defeated the mutant creeper, I have gotten a creeper egg. I had it for three days and the time has come for the egg to hatch. I crafted some mushroom stew to feed it.

Suddenly there was a crack on the egg! To my surprise a

little green head popped out and looked at me. I fed the creeper the mushroom stew and a few days later the creeper was following me around. I took me a few days to learn about it, but it became my pet! It was a very good per un-

til something very terrible happened.....

**Warning! Scary Story!**

By: Oliver

Once there was a little girl named Jessica. She lived with her dad near a forest and a camping site. She liked to play with her friends. One day she went to play with her friend at her friend's house which was a five minute walk for her. Jessica's dad called her friend and asked her to send his Jessica home. He was told by her friend that Jessica had been sent home three hours ago. John (Jessica's dad) went to look for her in the forest. It was very dark. John lit a match and saw his daughter laying on the ground. John became very afraid and began to run. He slammed into a large thin man. He looked up and saw the man was wearing a tuxedo and had a perfectly circular head and no face!

John ran home. The next day John went outside and go to the supermarket and to his surprise saw a sign pinned on his door that said: **DON'T LOOK BACK OR HE WILL TAKE YOU! NO EYES ALWAYS WATCHES!**

The next day the police to so interview John. The following is his official interview with the police:

*Police: "John, what does this guy look like."*

*John: " Well he is tall, he wears a tuxedo and a has a perfect circle for a head that has no face."*

*Police: "Now what happened John?"*

*John: " I don't know! Last time I saw my daughter she was lying on the ground! I cant eat, I cant sleep!"*

*Police: " John you need to calm down."*

*John: " I cant, because he's right behind you!"*

 Nobody know how much fashion is in the world.

## BY DANIEL

One day there was a large, stinky, weird frog that hogged all the fly's in his large tummy which was smelly. One time he went out to swim and a dragonfly came along and the weird frog tried to eat it, but the dragonfly put fire on the frog. The frog melted into ashes so the ashes swam some place to sleep. When the frog awoke in the morning the was no frog, but a sticky clowd in the air which was confusing. THE END

## Grandpa in the Army

By: Hagen

Once upon a time, there lived a really old grandpa who loved to watch TV. So you may know that as a citizen of the USA, you may have to serve in the army if needed. So one day this grandpa heard a knock at the door and this very old man got up and opened the door. In front of him was standing a official looking man. The man spoke in a deep voice and said you need to join the army. TO BE CONTINUED!

## Ask Cindy Mucklefoot

Dear Cindy,

Why do people have hair? -Julia-

*Julia please think about yourself without hair and then ask yourself is that what you want?*

Dear Cindy,

How was language created way back when? -Eliana-

*The origin of language in the human species has been the topic of scholarly discussions for several centuries. In spite of this, there is no consensus on its ultimate origin or age. One problem that makes the topic difficult to study is the lack of direct evidence, since neither languages nor the ability to produce them fossilizes. Consequently, scholars wishing to study the origins of language must draw inferences from other kinds of evidence such as the fossil record or from archaeological evidence, from contemporary language diversity, from studies of language acquisition, and from comparisons between human language and systems of communication existing among other animals, particularly other primates. It is generally agreed that the origins of language are closely tied to the origins of modern human behaviour, but there is little agreement about the implications and directionality of this connection.*

Dear Cindy,

Why is Will asking me questions? -JJ-

*JJ, Will is asking questions because he is dull, short man, with very little idea of what is actually going on around him. Please assist him by answering his questions. It would be quite troublesome to think of what a short, sad, meaningless existence he will have if he doesn't learn something, if anything during his time here. Its heart braking to watch him walk in circles and push on doors he should really be pulling.*

# A look at the Lynx

By: Chance

One of North Americas most endangered species. The Lynx thrives throughout most of Canada in to Idaho, Montana, Maine, Michigan, Wisconsin, Minnesota, Washington, Alaska and Colorado. Where ever this mammal lives it gets cold in the winter and generally experiences heavy snow fall. The Lynx loves snow because it gives the Lynx many places to store and hide food. Snow cant slow a Lynx down because it's feet act

like snow shoes and their fur keeps them warm as protects them like a heavy coat. The Lynx main pray is rodents such as mountain Rabbits, Squirrels, Deer, Voles and Carrion. The Lynx is very fast and adaptable to many hunting situations. Why this cat is so cool is because while most wild cats like grass land or jungles, this guy learned to survive in some the coldest places on the continent.
